Hoover's notes

JFK and King assassination records appeals Harold Weisberg 1/17/80
Files not searched - high officials, including FBI Director

My prior appeals in both cases include searches not made and records not provided from the files of the higher officials, including the FBI Director.

In the JFK files I have come to several references to 62-53925 that are of a nature indicating that this file holds Director Hoover's notes, memos, etc. The nature of the information in the records that hold this reference is such as would indicate that the number does not relate to the content of those records.

I believe that this and any similar files should be searched for compliance in both cases.

I believe that it is not possible for the FBI not to have been able to retrieve what the Director wrote and to retrieve it promptly, as I also believe it is not possible for the FBI not to have been able to retrieve promptly what he had been informed about these major cases in which he had such great interest.
